- ✓ Automatic leveling system
- ✓ Right side is premium glass with double opening glass doors & fixed folding stairs
- ✓ Rear middle double glass doors with wheelchair-lift accessibility (optional)
- ✓ High capacity airconditioning

\$599.000

Exterior Options

The Expandable Base Trailer 53ft is built in an octagon-shaped form. On the front, the left side is equipped with a solid wall, the center features double opening glass doors with fixed folding stairs, and the right side includes premium glass. On the right side of the trailer, premium glass panels continue along the length, including an additional set of double opening glass doors with fixed folding stairs. On the left side, the trailer is fitted with a full solid wall. At the rear, the left section is solid, the center section provides double glass doors with integrated wheelchair-lift accessibility, and the right section is finished with premium glass. Additional exterior features include two RGB LED lines, automatic leveling, two electricity ground pods, and multiple M16 cargo lashing points (a set of 8 plus an additional set of 10).

Beneath the trailer are several functional zones. This configuration includes a built-in generator in Zone 1, and closed storage boxes in Zone 2 and Zone 3. If required, the trailer can also be equipped with additional water tanks to support water supply needs.

Interior Options

Inside, the trailer is designed as a practical and adaptable space. It includes four RGB LED lines that allow lighting to be adjusted as needed, along with a flex rail system equipped with multiple electrical outlets and 12 LED spots for focused illumination. The interior is finished with durable PVC Zinc Silver flooring, chosen for its clean appearance and easy maintenance.

Each corner features a double electricity socket and two electricity ground pods to provide accessible power throughout the space, making it suitable for a wide range of equipment setups. The climate inside the trailer is regulated by two high-capacity 4-ton air-conditioning units, ensuring steady cooling even in larger or more demanding environments.

All the extras are built right in...

A summary of the interior systems and components that define the trailer's usability and day-to-day functionality.

PVC Vintage Zinc Silver

A shimmering silver finish with a vintage zinc flair, offering a blend of retro charm and modern elegance.

Flex rail system

A flex rail system with electrical outlets and 12 LED spots for practical lighting.

High-capacity dual AC

The climate is controlled by two high-capacity 4-ton air-conditioning units, providing steady cooling and comfort during use.

RGB LED lines

The four interior RGB LED lines divided into two groups. The two inner lines can be controlled independently, and the two outer lines can also be operated separately, allowing flexible lighting control throughout the space.

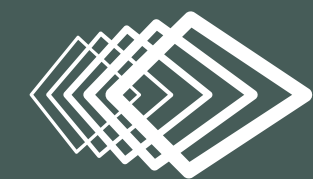

Double electricity sockets

Each corner of the space is equipped with a double socket, providing a total of eight plug-in points.

Cargo lashing points

The heavy-duty lashing points can support up to 3,307 lbs per point.
